## Winner of Best show award in Babel Fest 2019 – Romania

There are a German, an American and an Italian man.

It may seem the beginning of a funny joke, but it is a true story.

Three clown-soldiers, survivors from all wars of history, who come to erect a war memorial for every war and remember how much stupidity there has been in history.

If it happens that they are the ones to surrender to the vice they are exposing...

then everything becomes confused and we end up

laughing at the stupidity of stupidity.

Among classic and surprising gags, misunderstandings and betrayals, watching with our usual eyes the clowns' naivety and the man's weakness, to laugh at both in a play and to think again about it on our way home, maybe in front of the tv or while watching the usual TV news.

## Festival e tournèe

## About us

ECCENTRICI DADARÒ was born in 1997 by a desire for in-stability. Stability in an attempt to concreteness and continuity of a project; instability in the absolute freedom of expressive experimentation, trying not to settle on linguistically and stylistically as previously reached.

The heterogeneity allowed the creation of artistic projects aimed at different audiences and offered with distinct languages: Children's Theater, Street Theater, Prose, are equal fields of research on communication through the language of Theater.

The first search is around clowning, acrobatics, Commedia dell'Arte, the circus arts. The encounter between this experience and the text is the trigger of what will be the language of the Group in all subsequent productions: a search for balance between body language and the drama.

The many national and international awards, the more than 200 shows performed annually in Italy and Europe, the participation in many Italian and foreign festivals have made the company one of the strongest realities of the Italian theatrical scene in recent years.
